VegSense
Smart Storage Intelligence

DEMO DATA

Complete Vegetable Storage & Intelligence Report

Reporting Period: 24h

OPERATOR: Dr. Aris Thorne (demo@vegsense.io)
DEVICE: ESP32-DEMO-001 [DEMO DATA]
TARGET BATCH: BATCH-2026-TOM-01 (12 kg)
TELEMETRY: 24 points (raw)

Executive Environmental Summary

AVG TEMPERATURE	AVG HUMIDITY	AVG GAS/VOC INDEX	AVG LIGHT LEVEL
27.6°C	**73.3%**	**419**	**178 lx**
Range: 26.2 - 29°C	Range: 70 - 76%	Relative MQ-135 index	LOW LIGHT

ESTIMATED RISK	TOTAL ALERTS	MONITORED MASS	DATA QUALITY
17%	**0**	**82 kg**	**85%**
Status: FRESH	0 critical, 0 active	0 active batches	FAIR

Atmospheric Sensor Monitoring Analysis

Historical statistics recorded across storage chamber sensor arrays.

SENSOR METRIC	CURRENT	AVERAGE	MINIMUM	MAXIMUM	CONDITION STATUS
Temperature (°C)	26.6°C	27.6°C	26.2°C	29°C	**NORMAL**
Relative Humidity (%)	73%	73.3%	70%	76%	**OPTIMAL**
Gas/VOC Indicator	412	419	411	431	**NORMAL**
Light Level (lux)	0 lx	178 lx	0 lx	450 lx	**LOW LIGHT**

Estimated Spoilage Risk & Factor Breakdown

Multivariate risk scoring derived from Part 6 preservation heuristics.

RISK INDEX SUMMARY: Current: 16% | Average: 17% | Classification: FRESH | Historical Trend: STABLE

FACTOR CONTRIBUTIONS: Thermal Impact: 15% | Moisture Impact: 14% | VOC Impact: 18% | Photometric: 10%

RISK SPECTRUM TIME: Fresh (0–30%): 100% | Warning (31–60%): 0% | Risk (61–80%): 0% | Critical: 0%

Smart Storage Intelligence

DEMO DATA

Alert Notifications & Atmospheric Incidents

Total recorded: 0 (Critical: 0, High: 0, Warning: 0) | Avg Resolution: No resolution history

No atmospheric threshold incidents recorded in this timeframe.

Vegetable Storage Inventory Status

Total inventory: 4 batches (82 kg) across 4 produce types.

PRODUCE VARIETY	BATCHES	ESTIMATED RISK	ALERTS	STORAGE CONDITION
Tomato	1 batch(es)	18%	0	**OPTIMAL**
Potato	1 batch(es)	12%	0	**OPTIMAL**
Onion	1 batch(es)	14%	0	**OPTIMAL**
Carrot	1 batch(es)	19%	0	**OPTIMAL**

Actionable Storage & Engineering Recommendations

Targeted adjustments derived from active telemetry and threshold events.

PRESERVATION STATUS

Maintain current storage climate control parameters and routine sensor calibration cycles.

All monitored atmospheric parameters are within configured target thresholds.

TECHNICAL DISCLAIMER & SYSTEM SCOPE NOTE

VegSense provides environmental monitoring and estimated storage-condition/spoilage risk based on available sensor and storage data. The Gas/VOC sensor is an environmental indicator and does not by itself identify a specific spoilage gas. Risk classifications are configurable estimates and should not be interpreted as definitive confirmation of physical spoilage.
